**Date: 27 January 2016**

**Subject: REACH (1907/2006 EC)**

## REACH COMPLIANCE DECLARATION

EC Regulation No. 1907/2006 on Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) affects all companies producing, importing, using, or placing products on the European market. The aim of REACH is to improve the protection of human health and the environment from chemical substances contained within preparations and manufactured articles.

### Regulatory requirements

1. Manufacturers and importers of chemical substances and of any preparation are required to register the substance and its usage with the European Chemicals Agency (ECHA).
2. Manufacturers and importers are required to provide down stream users with material safety data sheets that document the risk to human health and / or the environment posed by the substance(s), specifically including the risk of contact or contamination from normal use and handling.
3. (2) also applies to a manufactured "article" that contains and might release substances during normal use and handling.
4. (1) also applies where an article contains or is made up of a substance and where the mass percentage per article exceeds 0.1% and where the cumulative trade volume of the substance exceeds 1 tonne per annum.
5. It is a manufacturer's responsibility to ensure that these obligations are met at the component level and not merely for the assembly / finishing process.
6. The list of "substances" that are controlled by the regulation is updated periodically.

## Trio Motion Technology Ltd

Trio Motion Technology Ltd (Trio) does not manufacture or import chemicals. Trio is an importer and user of “articles” as defined in REACH. The products that you (our customer) purchase do not contain and will not release any “substance” during normal use or within reasonable / foreseeable conditions of storage and handling and consequently, are exempt from requirements 1 and 2 above.

Trio Motion Technology Ltd does not intentionally add Substances of Very High Concern (SVHC) to our products and to the best of our knowledge they do not contain any SVHC (or if they do contain any SVHC then the presence is less than 0.1% wt/wt) except in cases where the product contains a battery. Under normal and reasonable conditions of use, storage and handling, these batteries will not release any substance.

The batteries are compliant with EU Directive 2006/66/EC.

Part No.	Part Description	Battery Component	Battery Quantity	Battery Weight (g)	SVHC
P136	MC206X	2V15H	1	1.8	HBCDD
P151	Euro205X	2V15H	1	1.8	HBCDD
P159	Euro209	2V15H	1	1.8	HBCDD
P860	MC464	CR2450	1	0.8	EGDME

Trio recognises that the list of substances and of SVHC as set out in the appendices of REACH is not static and Trio will undertake periodical reviews of the list to ensure continued compliance of our products/articles. At the time of publishing this document, to the best of our knowledge and with specific regard to Articles 17 and 69, Trio complies with all relevant regulatory requirements under REACH.

This declaration is issued under the sole responsibility of Trio Motion Technology Ltd.
